<sup>[1]</sup> The yield is determined by annualizing the fixed distribution rate and does not include any distributions in excess of the fixed distribution rate that may be paid at the fund's year-end. <sup>[2]</sup> This Monthly distribution is fixed but not guaranteed and may be adjusted from time to time at the discretion of the fund manager. <sup>[3]</sup> Risk rating measures the degree of uncertainty that an investor can handle regarding fluctuations in the value of their portfolio. The amount of risk associated with any particular investment depends largely on your own personal circumstances including your time horizon, liquidity needs, portfolio size, income, investment knowledge and attitude toward price fluctuations. Investors should consult their financial advisor before making a decision as to whether this mutual fund is a suitable investment for them.
